# BRACE Study

## *Brain Cancer and Exercise study.*

- Have you been diagnosed with brain cancer?
- Would you like your own **Exercise Physiologist** for the next **18 weeks**?
- Would you like a **free** exercise program **specifically tailored** for you?

**Then this study may be for you...**

If you:

- have a diagnosis of **primary brain cancer**
- are aged **18 years or older**

You may be eligible to **participate**.

We are interested in understanding the feasibility, safety and potential benefits of an 18 week exercise program for people who have been diagnosed with brain cancer.

For further information contact and to see if you are eligible to participate, contact Carolina Sandler on:

Phone: (07) 3138 6472 or Email: [brace@qut.edu.au](mailto:brace@qut.edu.au)
