Our Ref: 2013.33.213

24 January 2017

**Correspondence:** from Dr Jonathon Fanning dated 2016

**Study Title:** **Problematic changes associated with aortic valve management**

**Investigators:** **Dr Jonathon P Fanning, Dr Karl Poon, Dr Alexander Incani, Prof John Fraser, Dr John Keys, Dr Stephen Fanning, Dr Sarvesh Natani and Dr Bruce Garlick**

**The above low risk project and following documents were reviewed and approved on 24 January 2017 by UnitingCare Health's Human Research Ethics Committee:**

- Application to conduct above named research project at St Andrew's War Memorial Hospital.
- Participation Information Sheet SAWMH P.I.C.F. Version1 20/10/2016

Approval of this project from UnitingCare Health is valid from 24 January 2017 to 31 December 2018 but is conditional upon:

- Further elaboration is needed on the eligibility criteria, other than the procedures themselves.
- The reference to the District Manager in the 3rd paragraph, Page 4 of the PIS, should be altered to "Director of Medical Services, SAWMH"
- The opportunity to discuss the study participation with family, friends and own doctor needs inclusion in the project.

The UnitingCare Health HREC requires the submission of an annual report and once the project closes the submission of a closure or final report.

The UnitingCare Health HREC is constituted and functions in accordance with the National Statement on Ethical Conduct in Research Involving Humans (2007).

The Investigator was not a member of the UnitingCare Health HREC at the time the above-mentioned study was reviewed and approved.

Yours sincerely

Douglas Killer MBBS FRACP  
Executive Officer  
UnitingCare Health Human Research Ethics Committee
