Dr. Leang Rithea

Project: Monitoring and evaluation of efficacy and safety of Artesunate-Amodiaquine (ASAQ) in Ta Sanh Health Centre (Battambong) and Kvav Health Centre (Siem Reap) with a single 15-mg adult dose of Primaquine for the treatment of uncomplicated Plasmodium falciparummalaria malaria in Cambodia. Version N° 1, dated 15th May, 2015

Reference: - 26th February, 2016 NECHR meeting minute
- Your clarification letter on 252/16 ម.គិ.ថ on 10th March 2016
- Summary report of NECHR's secretary on 21st March, 2016

Dear Dr. Leang Rithea,

I am pleased to notify you that your study protocol entitled "Monitoring and evaluation of efficacy and safety of Artesunate-Amodiaquine (ASAQ) in Ta Sanh Health Centre (Battambong) and Kvav Health Centre (Siem Reap) with a single 15-mg adult dose of Primaquine for the treatment of uncomplicated Plasmodium falciparummalaria malaria in Cambodia. Version N° 1, dated 15th May, 2015" has been approved by National Ethics Committee for Health Research (NECHR). This approval is valid for twelve months after the approval date.

The Principal Investigator of the project shall submit following document to the committee's secretariat at the National Institute of Public Health at #80 Samdach Penn Nouth Blvd, Sangkat Boeungkok2, Khan Tuol Kork, Phnom Penh. (Tel: 855-23-880345, Fax: 855-23-881949):

- Annual progress report
- Final scientific report
- Patient/participant feedback (if any)
- Analyzing serious adverse events report (if applicable)

The Principal Investigator should be aware that there might be site monitoring visits at any time from NECHR team during the project implementation and should provide full cooperation to the team.

Regards,

Chairman

Prof. ENG HUOT
